The characteristic essences of the collection allow us to seek out the authentic diverseness of natural stones, re-interpreting their aesthetics following a penchant that is cultured and refined. The result is a random yet controlled mixing of hues and surfaces, a homogeneous and precious colour-shading.

Die charakterisierenden Elemente der Kollektion sorgen für die Bildung einer heterogenen Authentizität des Steins und interpretiert diesen in raffiniert ästhetischen Stil. Das Ergebnis ist eine zufällige, jedoch kontrollierte Mischung von Farbtönen und Oberflächen, Mittelpunkt einer homogenen und hochwertigen Marmorierung.

Voilà les éléments qui font tout le caractère de la collection et qui permettent de recréer l'authentique hétérogénéité de la pierre, revisitée dans un goût épuré. Le résultat donne un effet de mélange, à la fois aléatoire et contrôlé, de tons et de surfaces, l'exigence première d'une dégradation de couleurs homogène et de qualité.

Las principales características de la colección le permiten recrear la heterogeneidad real de la piedra, reinterpretadas de acuerdo con un gusto estético refinado. El resultado es una mezcla aleatoria controlada de tonos y superficies, el centro de un contraste homogéneo y fino.

Коллекция с точностью воспроизводит вид натурального камня, но придаёт ему своеобразное современное звучание. Сочетание разнородных тонов и фактур рождают эффект случайности рисунка, в результате чего изделия обретают ценную изысканность.
